## Report on the external operations

First of all, any operation must have plans and goals that need to be achieved before it begins, and you can measure the successes of any job if it has achieved its goal. Therefore, we defined to ourselves three goals, since the brother had assigned us to this mission, which are as follows:

- 1- Carry out an operation before the end of the year in which we started the work.
- 2- Establish structure and basics for the work; we will explain what that means later.
- 3- Transfer the idea and its plan to another trusted group, who will carry some of the load for us, and we will help them with whatever we can help, because the goal is to attack the enemies in their territory, or attack their interests, because these infidels are concentrating on whoever has relationship with us, more than any other groups that never pursued this road before.

That was our vision for the work, but have we achieved our goals? I will say the following:

- 1- First goal: I confess that we have not succeeded in meeting the first goal, due to many reasons. First of them was bad luck and God wasn't on our side; we had sent a number of the brothers to Britain and Russia and Europe to be prepared and ready to work before the end of the year, some of them were with us before, but they had left and came back to us and travelled again and they are Russia (exploding the gas line or the American Embassy), Britain (a number of targets, depending on what our brothers will determine what will be suitable (TN: of targets) that can fit what materials are available. According to our knowledge, the brothers have not faced any security problems except what the news had broadcast a few days before the apprehension of a few British individuals, and we are not sure if they belong to us or not, and these two

factors were the factors that we were depending on, after God, to help reach our goal, but the situation didn't go as well as we wish.

But the other brothers are new and we had rushed to send them very quickly, before their security was exposed or their residency documents expired, and we had trained them as much as we could in a short period of time (like, for example, the brother who came to us and as soon as he came the Mas'ud battle started, and had stayed two months, he spent one month on the road and waiting and had siege with us for two when we gave him an academic explosive course and travelled back before his residency expired, and we have not heard from him since he left, because it is very hard to communicate with him from our end and the strong wiretapping from his side. We hope that we hear from him very soon.

2- Second goal: We are not asking for a convenient atmosphere to work in to reach our goal, but we think that to do good and be creative at work depends on chance and on what we can do and what is available to us, but God knows that we have not done our best to create the correct atmosphere of work to reach our goal. Upon that, we have discovered that to have successful work, you have to know the basics of the work:

A- Personnel: They must be prepared spiritually, militarily, and psychologically to carry out this work.

B- Communications: We have to have secured methods of communications with these people and a safe way for them to travel back and forth, and to follow up on their news and the world news

C- Documents: We have a large number of brothers who had spent a long time with us and they are ready to work anywhere. In addition, we have brothers who have some security issues but the big problem are the legal documents; therefore, we have to resolve this problem because the new brothers whom we have sent very quickly, we can't guarantee their patience and their firmness in handling any enemy propaganda and tribulations.

D- Execution: One of the big problems that we are facing, even if we have all that it required to reach our goal, is when the brother is unable to carry out the operation because of the lack of the required tools (materials, weapons); therefore, we have to think of a new way to obtain these tools or invent new ways of execution.

If we would like to implement what we have discussed above, first thing we have to face is establishing a complete organization, which we cannot do because of the lack of finance and required cadres, and I think our job is executive work which has to belong to us. That is why we have thought to open an office for ourselves in Iran, to receive whoever comes to join us or someone traveling, but we have backed off this idea because it will be very expensive.

If we go over these points one by one, we will say the following:

A- The people who had spent a long time with us in the jihad battlefield, they are very well trained and prepared, but the new personnel whom we quickly deploy, we are trying to prepare them according to the available time and condition, and if there is another group that is willing to stay for 6 months, then it will be possible to give them more courses or to enter Afghanistan for more training. In the past we have bought some artillery pieces and electronics parts, so if someone comes to us we can train him very quickly, but in regards to legitimate and psychology matters, it is very easy for us more than the Sheikhs' visits.

B- Communications: Thank God that we had a secure method to communicate with our brothers whom we sent and we are still working to develop these methods. We are trying to be diversified in the method of communications and not use just one method, as well as use a coding program and decrease the amount of communications; trying not to send any messages from Pakistan as often as we can.

Transportation is a big problem and for that reason we are trying to open several offices in different places, for example, in the near future we will send brothers to

Somalia to run the business from Somalia and we have been trying to open another office in Turkey, but we unable to find the suitable brother for this office, and we had sent a brother to Iraq but he has not arrived yet.

Follow up on the news: We used to have an office to watch the news but it got bombed. Since then, we stopped watching the news; therefore, we are satisfied with listening to the radio and with what we receive from the media, in addition to some programs that belong to our work that were prepared by some friend from Pakistan. But watching TV news channels to know new ideas and enemy's tactics and his tricks, also to follow up on the international situation and discover the weak points, I think it is very important to our work; but it is very dangerous. That is why we live tribal lives; their news and their worries are not world news, where our work is. But we spend our time in reading intelligence files that have been prepared on the forum's site.

C- Documentation: we have renewed the machines and added some new personnel.

D- Execution: we have tried to solve this issue with several ways:

- 1- Manufacturing the materials from raw/primary materials, such as chlorate from salt
- 2- Transport the materials overseas by smuggling, after changing their shapes and camouflaging them.
- 3- To make the brothers use new methods like using house knives, Gas or Gasoline or diesel tanks, and other means, such as airplanes, trains, cars as killing tools.
- 4- Try to benefit from the brothers who were previously convicted in trying to obtain weapons.
- 3- Instigating other groups and cooperating with them in this field is a good idea, because it is better for us that someone will share this responsibility with us and also to disperse and scatter the enemies' efforts, instead of

concentrating only on Al-Qa'ida, and we thank God that there are some groups starting to cooperate with us.

Finally, in regards to targeting Denmark and Jews as per the orders, the situation is as follows:

- Denmark: we had sent a European group formed of 3 brothers a long time ago to carry out an operation in Denmark and the targets were American, but we lost our communication with them. But we heard that they had been captured but we're not sure; in addition, we have another brother who has been in jihad for long time.
- Jews: To be informed on who we had sent previously, and who had the capability to work in putting the Jews first (TN: he made the Jews his priority) on his list; also, we have been cooperating with two groups who are working in the same fields and there is progress and we are asking God to help.

End of the message
